CONNECTOR HOUSING NOT SERVICEABLE

Part No.: YPC500400

Colour: GREY

Cavities: 24WY

Harness: CABIN HARNESS

Description: Main harness to door harness

Location: In RH 'B' post

Qualifier:

USING THIS PUBLICATION

HEALTH AND SAFETY

Always follow health and safety guidelines, specifically the Electrical Precautions detailed in the Workshop Manual.

Important

The information provided in this publication is for use only by competent, qualified auto-electricians. Good product knowledge is assumed, as well as the ability to access and use recommended test equipment and other reference material provided.

Test equipment and other reference material

The information in this publication should be used in conjunction with the recommended test equipment; refer to Workshop Manual. Other reference material includes: Electrical Wiring Diagrams (EWD), Electrical Revision Documents (ERD), Technical Service Bulletins (TSB) and the Workshop Manual.

Battery disconnection and reconnection

It is imperative that any information relating to battery disconnection and reconnection is followed; refer to the appropriate sections in the Workshop Manual.

Fault diagnosis

Always use the recommended test equipment and test procedures for correct and reliable fault diagnosis; refer to the appropriate sections in the Workshop Manual.

NOTE: Before starting electrical checks on the vehicle, ensure that relevant mechanical functions operate satisfactorily; refer to the appropriate section of the Workshop Manual.

Abbreviations and acronyms

Abbreviation	Description
ABS	Anti-lock braking system
AUTO	Automatic transmission
AVI	Audio video input
BBUS	Battery backed-up sounder
BJB	Battery junction box
BSM	Blind spot monitoring
CAN	Controller area network
CJB	Central junction box
CVD	Continuously variable damping
D4	Diesel engine - Straight-four
DAB	Digital audio broadcasting
DBJB	Dual-battery junction box
DPF	Diesel particulate filter
DSC	Dynamic stability control
DTC	Diagnostic trouble code
DV6	Diesel engine - V6
DV8	Diesel engine - V8
EJB	Engine junction box
EGR	Exhaust gas recirculation
FFBH	Fuel fired booster heater
GPS	Global positioning system
HID	High intensity discharge
HLD	High level definition
HS CAN	High speed controller area network bus
LF	Low frequency
LH	Left hand
LHD	Left hand drive
LIN	Local interconnect network
MMM	Navigation system module
MOST	Media orientated system transport
M/S	Manual/sport
MS CAN	Medium speed controller area network bus
NA	Naturally aspirated
NAS	North American specification

PDC	Park distance control
PV6	Petrol engine - V6
PV8	Petrol engine - V8
PV8NA	Naturally aspirated engine - V8
PV8SC	Super charged engine - V8
RF	Radio frequency
RH	Right hand
RHD	Right hand drive
SAI	Secondary air injection
SCL	Steering column locking
SDARS	Satellite digital audio radio service
SRS	Supplemental restraint system
TCM	Transmission control module
TMC	Traffic message channel
TPMS	Tire pressure monitoring system
TV	Television
UK	United Kingdom
USB	Universal serial bus
VICS	Vehicle information and communication system

Wire colour codes

The following list contains wire colour codes used on the vehicle harnesses.

Code	Colour
BK or B	Black
GN or G	Green
PK or K	Pink
LG	Light green
BN or N	Brown
OG or O	Orange
VT or P	Purple
RD or R	Red
GY or S	Grey (Slate)
T	Transparent
BU or U	Blue
WH or W	White
YE or Y	Yellow

Connector number suffix

To provide more accurate connector information, in some instances, a suffix has been added to the connector that identifies the vehicle harness derivative; refer to the Connector number suffix table below.

Note: The suffix does not always appear on the circuit. Take care to use the correct circuits appropriate to the vehicle under scrutiny.

Connector number suffix table

Code	Derivative	Detail
A	PV6	Gasoline V6
B	PV8NA	Gasoline V8 naturally aspirated
C	DV6 or DV6EU3	Diesel V6 (EU3 compliant)
D	PV8SC	Gasoline V8 super charged
E	DV8	Diesel V8
F	D4	Diesel (in-line 4)
G	D6	Diesel (in-line 6)
H	DV6EU4L	Diesel V6 (EU4 compliant, left-hand drive)
J	DV6EU4R	Diesel V6 (EU4 compliant, right-hand drive)
K	DV8R	Diesel V8 (right-hand drive)
L	LHD	Left-hand drive
P	PETROL	Gasoline
Q	DIESEL	Diesel
R	RHD	Right-hand drive

Connector details

A page is dedicated to each connector, with the information presented in a standard format. Connector information comprises:

- **Connector Designation –** The designated reference, prefixed 'C'.
- **CONNECTOR HOUSING SERVICEABLE –** The part identified is available through the normal parts ordering process.
- **CONNECTOR HOUSING NOT SERVICEABLE –** The part identified is not available.
- **Description –** Usually derived from the component to which the connection is made.
- **Location –** Used in conjunction with the photograph to indicate the location of the connector.
  Note: References to the LH or RH side given in this document are made when viewing the vehicle from the rear.
- **Qualifier –** For some connectors it is not possible to represent all possible conditions. An image may show a left-hand condition, the right-hand condition may be similar and is identified as such using a Qualifier, for example: LHD condition illustrated.
- **Location Image –** Shows the location of the subject connector. For convenience, some images identify more than one connector.
  Note: Images do not necessarily represent the optimum method for accessing a connector, always refer to the appropriate Service Repair Operation within the Workshop Manual before attempting to access a connector.
- **Face View –** An outline of the connector housing, viewed from the front, showing pin numbers (if applicable).
- **Part No. –** The part number as it appears on the harness drawing (if applicable).
- **Colour –** If applicable, the colour of the connector housing is shown. NATURAL is used to describe connectors with a clear/translucent plastic finish.
- **Gender –** If applicable, identifies the gender of the connector pins (NOT the housing) as Male or Female. Generally, connectors mating directly into a component have Female pins.
- **Type –** Generic connector group.
- **Cavities –** Identifies the number of cavities within the connector.
- **Wire Chart (Pin-out table) –** A five column table, giving details of each wire within the connector:

Sample Wire Chart and Service Repair Kit Information

The five columns provides specific wiring information related to each connector.

1. **Cav:** The connector pin (cavity) number.
   NOTE: Wires may not be fitted to all cavities.
2. **CSA:** The cross sectional area of the wire in mm².
3. **Col:** The colour of wire populating the connector pin.
4. **Cct:** Identifies the model or option which uses the wire. 'ALL' means applicable to all models in the range fitted with the feature or system in question. In instances where different models, features or systems require different colour wires to be fitted in a cavity, each instance of the cavity is included in the pin-out table.
5. **Destn:** The destination of the wire.

The last seven columns provide Service Repair Kit (SRK) information where applicable.

NOTE: When the seven columns are not shown, no SRK is available for that particular connector.

If a connector uses more than one type of terminal (pin), more than one service repair kit may be required.

1. **Pre-Terminated Lead:** Pre-terminated leads (connector pins with 90mm wire 'pig tails').
2. **Extract Tool:** Connector pin extractor tools.
3. **Crimpers:** Terminal applicator tool.
4. **Wire Stripper:** Wire cutter/stripper.
5. **Heat Shrink Sleeve:** Adhesive-lined heat-shrink sleeving.
6. **Ident Sleeve:** Wire colour identification sleeves.
7. **Splice:** Splice connectors.

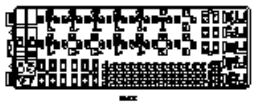
Connector: C0570R

CONNECTOR HOUSING NOT SERVICEABLE



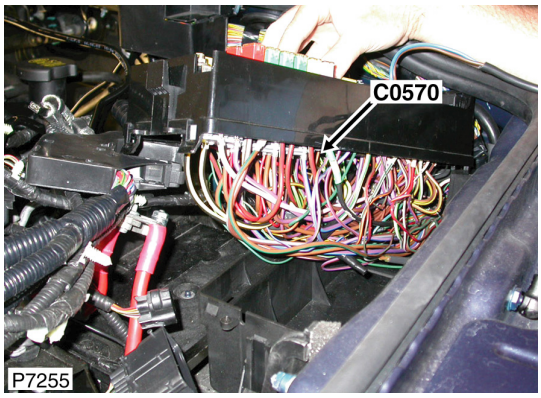
Part No.: YQE900020
Colour: BLACK
Cavities: 194WY

Harness: ENGINE COMPARTMENT HARNESS

Description: Junction-box engine

Location: Beneath engine compartment fusebox

Qualifier:



Wire Chart and Service Repair Kit Information

FIBRE OPTICS

General

The fibre optic system installed uses Media Oriented Systems Transport (MOST), which is a multimedia network, optimized for automotive applications. Its design allows it to provide a low-overhead and low-cost interface for the simplest of devices, such as microphones and speakers. More intelligent devices can automatically determine the features and functions provided by all other devices on the network and establish sophisticated control mechanisms without distracting the driver.

Under normal installation conditions the system is robust and failures should not occur. However, since the optical fibres convey data using infra-red light, it is vital the passage of light down the fibre is unobstructed. Obstruction of infra-red light can be caused by:

- Contamination of the fibre ends.
- Damage to the fibre ends.
- Bending, kinking or damaging the cable.

NOTE: Fibres damaged by kinking or exposure of the optical core due to abrasion must be replaced.

Handling

Take special care to avoid damage or contamination when handling or working in the vicinity of fibre optic cables and connectors.

NOTE: Damage or contamination includes scratches to the cable ends and pollution caused by dust, dirt, oil or moisture.

CAUTION: When handling fibre optic cables cleanliness is of paramount importance. The fibre ends should not be touched even with clean bare hands as the natural oils deposited from the skin may penetrate the fibre or may cause dirt to adhere to the fibre end.

System malfunctions and unnecessary warranty claims can be minimised by following these guidelines:

- After disconnection of any cables, carefully install appropriate dust caps to protect the mating faces of the connectors from damage or contamination.
- Avoid introducing tight bends (less than 30mm radius) or kinks into the fibre optic cable during service or repair. Tight bends or kinks could impair operation, cause immediate system failure, or future system failure.
- Avoid excessive force, strain or stress on the fibres and connectors, especially permanent stress after reinstallation.

Part No.: YPC909060

Colour: BLACK

Cavities: 2WY

Harness: ENGINE PETROL V8 N/A HARNESS

Description: Purge control valve - PV8NA

Location: Top of engine

Qualifier:
